

From the Communist Party of the Philippines (PKP-1930)

Let us continue to wage the militant struggles against the restoration of the imperialism

Eduardo F. Landayan (General Secretary, Communist Party of the Philippines (PKP-1930))

Dear Comrade,

Our Party; the Partido Komunista ng Pilipinas (PKP1930, the Philippine Communist Party), extends to the leaders and participants to forthcoming events on International Women's Day on March 9, 2024 in Tokyo its revolutionary and comradely greetings. We wish your success in this endeavor.

Dear Comrade, I had written it earlier that simultaneous with you with your events, our Party's Women's Group will also hold a celebration related to the flight of our women. Related to peace and danger confronting our country brought about by the hype tension in our West Philippine Sea (South China Sea) and the current move of our economic and political oligarch and their foreign imperialist partners which dominate our government. They are in the chorus of amending our Constitution. They want to remove the provision of our constitution that safeguard our ownership of land, natural and patrimonial resources, of our strategic industries in the public sector (water, energy, power and transportation) and in our print and broadcast media and advertisement.

Currently our constitution has prohibited the one hundred (100) percent foreign ownership and exploitation of those resources and entities. It provided that those resources and economic entities should belong only to companies and individuals whose majority owners are Filipinos. They want to strike out it out in our Constitution.

Together with this is our common struggle for peace and security in our region...Asia and the Pacific. The threat of war is looming everyday! Tension is exacerbating between Taiwan and the People's Republic of China (PROC), and the daily friction between the PROC and our country with Vietnam is now occurring. This tension is being hype by the United States which lately has sent two of its Naval striking groups intentionally challenging Chinese naval presence in the region. This is very dangerous for it may lead to total naval confrontation and war in Asia and the Pacific Region.

American hegemonic strategy in Europe is now fulfilled. With the forthcoming defeat in Ukraine on the battlefield, the USA has won the economic war against Europe. Europe which the USA considered before the Ukraine conflict to be his economic rival has collapsed. The war and sanctions imposed by the USA, NATO achieved the contrary. Europe instead of Russia suffered the economic collapse thereby creating Europe an

economic, military and financial vassal of the USA. Currently this strategy is now employed in the Middle East with Iran as the target and tomorrow it will be Asia and the Pacific being the surviving economic rival. It is very obvious that US imperialist economic and political interest is to resurrect the post Second World War imperialist global landscape. A scenario and strategy which is very dangerous to Asia, Europe and the rest of the world.

Seventy years ago, this type of imperialist war has confronted us, with your country suffering most of the atomic bomb genocide, with death of million and destruction of billions of properties. This should not happen again. We should strive for peace and prosperity. We should foster human friendship and harmony.

With need a continued militant action against such imperialist resurrection. We need global collective action to preserve humanity, for peace, for democracy and socialism.

No to imperialist War!

Long Live the International Women Day!

Thank You.

Eduardo F. Landayan
